SERVICES DIVISION INDICATIONS JOURNAL

29 April 1955

2. Formosa Straits - Economic - Communications
(Info Date - Current)

Aerial photography confirms that the Amoy radio installation reported in item #1, 26 Apr 55 is under construction. The station should be operable within three weeks. As in the case of the Foochow installations of the same size, the directional antenna point towards Formosa.

S/Com Comment: It is possible that these new stations will be used for propaganda purposes. Propaganda directed against Formosa thus far has not been particularly successful because the low power short wave transmitters used at Foochow and Amoy. FBIS will conduct an entire and constant search for these stations and report negatively each week until they are heard.

As indicated in item #1, 26 Apr 55, amphibious operations may be controlled by these facilities on the broadcast band. In this connection, see item #3, ~~29~~ 29 Apr 55 (following) for indication of the use of public address equipment on landing craft.
